

ASIM SIMKHADA

Fairfax, VA • (571) 567-7643 • asimkhada100@gmail.com

EDUCATION

George Mason University

Aug 2024 - May 2028

Bachelor of Science in Cyber Security Engineering

- GPA: 3.74/4
- Relevant Course Work: CYSE130(Python), CS112(Python), CS222(C), Calculus 1&2, Systems Engineering, Object-oriented Model & Design, Computer Networking

SKILLS

- Tools & Software: Project Jupyter (Python), Onshape (CAD), BBEdit (Python), Wireshark(Packet-analysis), Innoslate 4(MBSE), LENAL, Amazon Optics, Linux, Unix
- Languages: English (Native), Nepali (Native), Hindi (Basic)

WORK EXPERIENCE

Data Center Security Specialist (L3), Amazon Web Services

May 2026 - July 2026

- Developed an automated webhook system that increased ticket visibility and reduced response times by 20%
- Coordinated with security contractors, internal teams, and external vendors to support physical security initiatives and maintain compliance with AWS security standards
- Assisted in monitoring and maintaining physical security systems, including badge access controls, visitor management procedures, and incident response processes
- Applied IAM least-privilege principles to ensure appropriate user access.

Data Center Security Supervisor, First Coast Security

July 2024 - April 2026

- Provided leadership and guidance for a group of 7-8 security personnel at an Amazon site, emphasizing effective communication, team management, and conflict resolution skills.
- Administered user access to the data center and monitored the security system for activity, using LENEL and Amazon Optics.
- Ensured systems were running properly, maintained security logs, and prepared incident reports, demonstrating attention to detail and analytical problem-solving skills.

Peer Tutor-Knack, George Mason University

Jun 2025 - Jun 2026

- Tutored students Calculus 1 and Intro to Business Calculus.
- Assist students in understanding key concepts and improving problem-solving skills
- Adapt tutoring approach to accommodate individual learning styles for more productive outcomes

PROJECTS

Smart Pill Dispenser

- Designed hardware for a motion-sensing pill dispenser and used C programming, exemplifying hands-on engineering skills, precision, and teamwork.

Secure & Real-Time Shuttle App Modeling Using MBSE

- Simulated workflows and digital twin to improve performance and security.
- Developed requirements, structural, and behavioral models using Innoslate 4 and MBSE techniques.
